ABOUT THE CONFERENCE

Today, marketing is not simply a business function rather it’s a philosophy, a way of thinking and way of sailing a business in the vibrant marketplace. Marketing offers complex experiences and services to its customers in a very competitive and global marketplace. The marketers deal with issues relating to identification of target market / consumers, adopt suitable strategies to promote the product and finally to ensure customer value, satisfaction and loyalty from this consumption. Therefore, marketer must have the sense to satisfy consumer needs, contribute in developing products / services that provide superior values and distributing them effectively. The tourism and hospitality products, because of its unique intrinsic qualities are difficult to promote to the potential consumers. In the current marketing context, a new marketing paradigm has evolved where there was once division between marketing and IT teams now there is unity. Where technology once struggled to meet marketing objectives without clear attribution, now it’s deployed to support business goals with rich analytics. This is a time period where the role “marketing” is being redefined faster than most organizations can respond.

The current a one-on-one world with a personalized touch and experience with customers helps in achieving this new marketing paradigm and also face the challenges. The new marketing practices use current digital technology platforms to sustain and grow in the market. World-class organizations achieving this new paradigm are taking a unique approach. They are creating incremental transitions from their data warehouse with The Customer Data Platform, BI tools, advanced AI and analytics etc.
